The Faculty of Physics offers study programs in fields such as: Medical Physics, Mathematics Physics or Technological Physics, Environmental Physics, Computational Physics. The study programs include both fundamental and technical courses, while the faculty laboratories lead research activity in Condensed Matter Physics, Low Temperature Physics, Computational Physics, Magnetic Resonance Spectroscopy, Biophysics and Molecular Spectroscopy.

The faculty offers students the opportunity to study in the framework of a well-developed infrastructure. The faculty's library comprises over 40,000 titles of some of the most prestigious in the field. Also, together with the Universities across Europe, the institution is part of research projects, as well as works for the improvement of its development.
